EDUCATION

BESTLINK COLLEGE OF THE PHILIPPINES

BS Computer Science Information Technology

Major in Information Management

General Weighted Average (GWA): 1.50 / 1.00

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems, Web Development

Quezon City
2027

PROJECTS

Fraud Detection System in Microfinance | *React, TypeScript, Express.js, Supabase*

2026

- Developed a web-based microfinance system for managing clients, loans, repayments, and financial transactions.
- Implemented rule-based fraud detection to identify suspicious transactions and generate risk alerts.

Inn Nexus — Hotel Management System | *PHP, MySQL, Tailwind CSS, REST API*

2026

- Developed a web-based hotel management system for reservations, room management, billing, housekeeping, inventory, and guest services.
- Implemented secure authentication with two-factor authentication, password hashing, CSRF protection, and session management.

Human Resources Management System | *React, TypeScript, Vite, Supabase, Tailwind CSS*

2025

- Developed a web-based HR management system for employee records, attendance, leave, performance, and payroll management.
- Implemented role-based access control for administrators, HR personnel, payroll officers, managers, and employees.

Coach-Hoo — Nutrition & Food Tracking App | *React Native, Expo, TypeScript*

2026

- Developed a mobile application for tracking food intake and monitoring nutritional and macronutrient information.
- Built reusable components and modular services using TypeScript for a structured and maintainable mobile application.

FleetOps — Fleet & Transportation Management System (Capstone Project) | *Next.js, React, React Native, Expo, Supabase, PostgreSQL*

2026 - Ongoing

- Developed a web and mobile transportation management system for hotel guest transportation, covering reservations, vehicle and driver scheduling, dispatching, trip management, and GPS tracking.
- Implemented role-based workflows for administrators, fleet managers, dispatchers, drivers, and management, with automated tracking of fuel, odometer, and vehicle maintenance records.

ACTIVITIES

EGOVPH HACKATON

Programmer July 21, 2026 – July 22, 2026

SMX Convention Center, SM Aura, Taguig

- Created the eRescue, a mobile app integrated with eGov ph app. The app guides the citizens through interactive map to a near evacuation center/place in times of calamity.
- The app lets any near government agencies inform and detect any casualties, crimes and accidents in real time, making the rescuers becoming more responsive in any danger.

ADDITIONAL

Technical Skills: Proficient in JavaScript/TypeScript, PHP, React, Node.js, MySQL, HTML/CSS; Familiar with Python, Git, REST APIs

Certifications: **Python Certification;** freeCodeCamp , **HTML JavaScript in Action:** Coddy Team, **HTML Practical Frontend:** Coddy Team
